

# Notes by manual sqli

1. SQL injection vulnerability in the product category filter.
2. there are 2 columns and the 2nd columns consists string datatype

`/filter?category=Gifts' UNION select NULL,'a'--`

3. even both columns contains string datatype

snow melts, and allow 3 day

a

a

4. `' UNION select username, password from users- -`

the reason that I can do that here because the columns in the query that i've wrote are equals to the columns i've gotten

5. yup we have gotten the data

- 6.
